X	General	Challenge Academy Koregaon Dis:Satara	Maharashtra State Board of Secondary and Higher Secondary Education,Pune	2017	74.2 %	I

- **CDAC Certified – Sunbeam Hinjewadi Pune Centre for Development of Mobile Computing**
PG Diploma in Mobile Computing (PG-DMC) | Feb 2025 – Aug 2025 |

Technologies:

- Java,
- React js,
- React Native,
- MySQL, Android,
- IOS,
- Html,
- Css,
- Javascript,
- Linux,
- AI on Mobile Platform

-

Major Project:

Title : PayingGuestBookings

Platform : Hybrid Programming

Duration : 1 Month

Description : PayingGuestBooking is a robust, fullstack platform engineered to assist working professionals and students in effortlessly locating, booking, and managing Paying Guest (PG) accommodations. Built using Spring Boot as the backend framework, MySQL for data persistence, React.js for the web interface, and React Native to support mobile usage, the system delivers seamless experiences across devices. PayingGuestBooking automates this entire process end to end. With predefined roles Admin, PG Owner, and Guest/User the system streamlines workflows for each stakeholder: owners can list properties, guests can search and book PGs, and admins can oversee operations, approve listings, and generate analytics. Features such as realtime room availability, booking approval automation, payment tracking, and notification alerts enhance transparency and efficiency, aligning with modern user expectations.

Title : Text to image generation using AI and Deep Learning Platform :

Python Duration : 6 Months

Description : We can type a long text which may be our Imagination which we want to generate in one picture using GAN Algorithm and AI we can get similar image according to our text written. we can add text in paragraph. This study offers a concise overview of text-to-image generative models by examining the existing body of literature and providing a deeper understanding of this topic. This will be accomplished by providing a concise summary of the development of text-to-image synthesis, previous tools and systems

employed in this field, key types of generative models, as well as an exploration of the relevant research conducted on GANs and diffusion models.

Technical Skills

- Programming Languages: Java, Android, Ios
- Web Development: HTML, CSS, JavaScript, React js , React Native
- Frameworks: Spring Boot, Node.js
- Databases: MySQL, MongoDB
- Tools: Git, Postman, IntelliJ, VS Code
- Other Skills: REST APIs.

Soft Skills

- Problem-Solving
- Teamwork
- Communication Skills
- Adaptability
- Time Management
